- 25X1 1. The condition of all motor vehicles in Poland is extremely poor. There are about 250 different types of foreign vehicles in the country, and maintenance is difficult because of the acute shortage of all spare parts and raw materials needed for repairs.
- 25X1 2. Motor vehicles are divided as follows:
- Trucks 33,500 of which about 30% are in running order and about 40% undergoing repairs.
 - Passenger automobiles 18,500 of which about 33% are in running order and about 50% being repaired.
 - Motorcycles 12,000 of which about 40% are in running order.
 - Tractors 9,000 of which about 50% are in running order and 40% being repaired.
3. It was estimated in July that about 5,500 tractors would be ready for the coming harvest. 5,000 more tractors had been promised by the Russians.
